ABSTRACT

The aim of the presentation is to provide the participants with the basic notions on patents, with an eye to their future work in research, both for university or private companies, or as patent professionals. It will be focused on the following points:

- 1 What is a patent and how it fits in the context of intellectual property;
- 2 How does a patent looks like - how to draft a patent application;
- 3 Requisites for patentability;
- 4 Strategies that can be used by private companies or universities;
- 5 Documental search and search strategies.
